1.	ASP is a	technology that enables scripts to be executed by an internet server.
Ор	tions:	
a. \$	Server Side scrip	iting
b. (Client Side script	ting
c. (Computing web	
d. I	Data handling	
An	s:- a	
2.	An ASP engin	ne reads the file and executes the script in the file which is marked as
Ор	tions:	
a. I	ine by line Clien	t script
b. At a time ,Server script		r script
c. <i>A</i>	At a time Client s	script
d. line by line ,Server script		ver script
An	s:- d	
3. <% Response.Write("Hello")%> or <%="Hello"%> are not same.		Write("Hello")%> or <%="Hello"%> are not same.
Ор	tions:	
a. ٦	Γrue	
b. I	False	
An	s:- b	
4.	When a brows	ser requests an ASP file, IIS passes the request to the ASP engine(ASP.DLL) on the server.
Op	tions:	
a. ٦	True	
b. I	False	
An	s:-a	
5.	Input type but	ton and reset and disabled elements name and value pair is submitted to the server.
Ор	tions:	
a. ٦	True	
b. I	False	
An	s:- b	

Options: a. True b. False Ans:- a. 7. Which of the following method is used to get the value of form elements in the server? Options: a) request("txtName") b) request.form("txtName") c) response.form("txtName") d) response("txtName") Ans:- b 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.Write(txtName) d) request.write(txtName) 7. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page? Options: a) enctype="multipart/form-data" b) enctype="multipart/form-upload" d) enctype="multipart/form-data" Ans:- d 10. For <select> tag to make particular item to be selected attribute is used for in the <option> tag. Options: a) item="SELECTED" b) name="SELECTED" b) name="SELECTED"</option></select>	6. Input type button is used for writing client side JavaScript code.
b. False Ans:- a. 7. Which of the following method is used to get the value of form elements in the server? Options: a) request.("txtName") b) request.form("txtName") c) response.form("txtName") d) response("txtName") 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.Write(txtName) d) request.print(txtName) d) request.print(txtName) 9. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page? Options: a) enctype="multipart/ford-data" b) enctype="multipart/form-upload" d) enctype="multipart/form-data" Ans:- d 10. For <select> tag to make particular item to be selected attribute is used for in the <option> tag. Options: a) item="SELECTED"</option></select>	Options:
Ans:- a. 7. Which of the following method is used to get the value of form elements in the server? Options: a) request("txtName") b) request.form("txtName") c) response.form("txtName") d) response.form("txtName") Ans:- b 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.Write(txtName) d) request.print(txtName) d) request.print(txtName) 4. Nas:- b 9. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page? Options: a) enctype="multipart/fmodel-data" b) enctype="multipart/form-upload" d) enctype="multipart/form-upload" d) enctype="multipart/form-data" Ans:- d 10. For <select> tag to make particular item to be selected attribute is used for in the <option> tag. Options: a) item="SELECTED"</option></select>	a. True
7. Which of the following method is used to get the value of form elements in the server? Options: a) request("txtName") b) request.form("txtName") c) response.form("txtName") d) response("txtName") Ans:- b 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.Write(txtName) d) request.print(txtName) d) request.print(txtName) 9. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page? Options: a) enctype="multipart/model-data" b) enctype="multipart/text-data" c) enctype="multipart/form-upload" d) enctype="multipart/form-upload" d) enctype="multipart/form-data" Ans:- d 10. For <select> tag to make particular item to be selected attribute is used for in the <option> tag. Options: a) item="SELECTED"</option></select>	b. False
Options: a) request("txtName") b) request.form("txtName") c) response.form("txtName") d) response("txtName") Ans:- b 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.print(txtName) d) request.print(txtName) Ans:- b 9. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page? Options: a) enctype="multipart/model-data" b) enctype="multipart/form-upload" d) enctype="multipart/form-upload" d) enctype="multipart/form-upload" d) enctype="multipart/form-data" Ans:- d 10. For <select> tag to make particular item to be selected attribute is used for in the <option> tag. Options: a) item="SELECTED"</option></select>	Ans:- a.
Options: a) request("txtName") b) request.form("txtName") c) response.form("txtName") d) response("txtName") Ans:- b 8. Which of the following method is used to write something dynamically in the webpage? Options: a) request.Write(txtName) b) response.Write(txtName) c) response.print(txtName) d) request.print(txtName) Ans:- b 9. Which of the following attribute is mandatory in form tag when upload control <input type="file"/> element contains that page?
